

Senior Research Fellow - School of Nursing and Midwifery - Grade I

Job Description

Purpose

The post-holder will, with support from existing colleagues and Director, lead the delivery of the Lancashire research Institute for Global Health and Wellbeing (LIFE). The post-holder will have responsibility for the day-to-day operational management of the Institute working alongside experienced colleagues.

The post-holder will also contribute to the research profile of the University by conducting world-leading research in Stroke Research Team. The post holder will be supported by experienced researchers, whilst further developing their own skills and experience in health research.

Duties

1. To develop a programme of high-quality individual and collaborative research relating to the themes of digital health technologies and stroke rehabilitation research.
2. To conceive, write and submit research proposals with the aim of achieving grant capture.
3. To undertake research using appropriate methods with a view to producing a range of high quality outputs including publications in peer-reviewed journals.
4. To support the Professoriate and other colleagues in the School in the research and bidding process.
5. To promote the dissemination of research at University of Central Lancashire through conferences, courses, publications, professional bodies and associated research communities.
6. To contribute to the strategic development of research in the School with respect to University internal and external requirements.
7. To contribute to the supervision of researchers and research students aiming to achieve postgraduate and research degrees.
8. To contribute to the research informed teaching and assessment of students in the School.
9. To maintain and further develop the School's external national and international contacts relating to the relevant research areas.
10. With regards to the nature of your role and its impact upon our students, make an active contribution to and support the improvement of the student experience.
11. To carry out research administrative duties as required.
12. To perform any other activities in line with the requirements of the role as determined by the nominated reporting manager, Professor of Stroke and Older People's Care / Professor in Stroke Care and Improvement / Faculty Director of Research and Enterprise / Head of School / Executive Dean, commensurate with the grading of the post.

Person Specification

Knowledge, Skills, and Behaviours (Essential)

- Previous research experience in the area of stroke rehabilitation (Application/Interview).
- Demonstration of the ability to conduct world-leading research (Application/Interview).
- Previous experience of bidding for research project funding from major funding sources (e.g. research councils, European union, major charities, government) (Application/Interview).
- A track record of high-profile research publications in recognised, high impact journals (Application/Interview).
- A Doctorate in Health (Application).
- Proven ability or potential to generate external funding (grants, contracts etc) to support high-quality research projects (Application/Interview).
- Be able to contribute and support the whole research endeavours of the School (Application/Interview).
- Be able to produce high-quality research outputs of 3* (international quality) or 4* (world-leading level) that have significant impact in the field, for publication in monographs or recognised high-quality journals, as appropriate (Application/Interview).
