

DCP Epidemiological studies supervisor (Dental Therapist) - School of Medicine and Dentistry - Grade H

Job Description

Purpose

To make a contribution to achieving the academic objectives of the School through teaching, course co-ordination and the development of research and knowledge transfer opportunities.

Duties

1. To engage in the teaching and supervision of dental research programmes including but not limited to PHE and LCC epidemiological studies.
2. To undertake clinical supervision of students, both in the Clinical Skills Room and in a clinical setting (Uclan Community Dentists Limited), within scope of practice.
3. To take day to day responsibility for the organisation and co-ordination and delivery of epidemiological studies as advised by study administrative lead.
4. To undertake administration in relation to specified research/knowledge transfer activities.
5. To contribute towards curriculum development.
6. To engage in development activity in relation to hygiene therapy and training of the dental team.
7. To maintain clinical skills via contribution to patient treatment and care.
8. Working within a collaborative framework, to contribute towards the development of the School's emergent research portfolio.
9. To participate in research activity within an area of medical science or medical education.
10. To engage in commercial/income-generating activity within area of expertise.
11. To work productively as part of a team to secure School objectives.
12. To undertake any other duties relevant to the School's activities and commensurate with the level of the post.
